

WELCOME TO TRUE CONNECTION

FLAGSHIP INFLIGHT WIFI SYSTEM

WiFi That Transforms Flight.

SmartSky Networks' next-evolution air-to-ground (ATG) network provides an unmatched inflight WiFi experience for both cabin and crew. Each aircraft receives its own signal due to our patented beamforming technology, providing a secure experience. Our connectivity products and services have been engineered for one goal: to provide the greatest possible benefit to those who fly.

INFLIGHT LOW LATENCY CONNECTIVITY SOLUTION

Aircraft maintenance data • Large file transmission • Live online gaming
Multi-GBs per hour data throughput • Operational applications • Real-time weather monitoring
Video and music streaming • Video conferencing • VPN compatible
