**SmartSky Flagship** is designed for mid- to large-cabin aircraft. From business productivity and entertainment to aircraft performance data and situational awareness for operations, SmartSky's advanced air-to-ground (ATG) network provides sustained, high-speed connectivity for the entire aircraft. Our patented technology delivers unprecedented performance and unmatched capability for transferring data to and from the aircraft, delivering two-way data flow for staying connected in real-time to whatever is most important.

## BE CONNECTED, WITH SMARTSKY

Contact your preferred partner to design your connectivity solution and select your hardware and services.

Service plans are offered through our service provider, Honeywell Forge.
