SmartSky Flagship is designed for mid- to large-cabin aircraft. From business productivity and entertainment to aircraft performance data and situational awareness for operations, SmartSky's advanced air-to-ground (ATG) network provides sustained, high-speed connectivity for the entire aircraft. Our patented technology delivers unprecedented performance and unmatched capability for transferring data to and from the aircraft, delivering two-way data flow for staying connected in real-time to whatever is most important.

Be connected, with SmartSky

Contact your preferred partner to design your connectivity solution and select your hardware and services.

Service plans are offered through our service provider, Honeywell.
