SmartSky LITE brings SmartSky's patented air-to-ground (ATG) technology to smaller business aircraft that cannot fit the SmartSky Flagship system. The LITE system uses a combination of 5G and LTE features to deliver dependable, responsive, and secure connectivity for high-bandwidth applications. Experience stable data flow to and from the aircraft for everything from video calling and live streaming to operational flight data and situational awareness.

Be connected, with SmartSky

Contact your preferred partner to design your connectivity solution and select your hardware and services.

Service plans are offered through our service provider, Honeywell.
